- OEE
- Modbus
- EUROMAP63

SKILLS

Data Engineering

Data modeling, ETL, reporting logic, data quality.

Manufacturing Systems

MES, Industrial IoT, downtime, plan adherence, cycle time.

Business / Operations

Requirements translation, process standardization, executive reporting.

Juan Roberto García Gómez

Data Engineer · MES · Industrial IoT · Manufacturing Analytics

PROFESSIONAL SUMMARY

Data Engineer specializing in MES, Industrial IoT and manufacturing analytics. I build production-ready systems that connect machines, shopfloor execution, structured data and management visibility — designing PostgreSQL models, Node.js services, React applications and Power BI dashboards that replace manual reporting with live plant data.

SELECTED IMPACT

- Reduced manual production reporting by 90% by capturing machine output in real time, leaving operators responsible only for downtime and defect context.
- Connected 34 injection machines through EUROMAP63 and Modbus across ENGEL, WOOJIN and SUMITOMO platforms.
- Delivered 24/7 plan-vs-actual visibility for leadership, including stop causes, machine status and unplanned production detection.
- Unified 6 plant areas — injection, assembly, EPC, tooling, quality and maintenance — in one connected MES + ERP platform.

PROFESSIONAL EXPERIENCE

Chunil Mexico

Oct 2024 – Present

Data Engineer · MES & Manufacturing Analytics

Designed and shipped production-ready manufacturing systems and analytics that support daily plant execution, visibility and management follow-up.

- Designed and deployed a web-based **MES** that replaced spreadsheet control with centralized workflows across Injection, Assembly, EPC, Tooling, Quality and Maintenance.
- Built **PostgreSQL** data models and **Node.js** services for machines, parts, molds, shifts, cycle times, targets, downtime, quality and reporting.
- Reduced manual production reporting by **90%** by integrating live machine output into the system.
- Integrated **34 injection machines** via EUROMAP63 and Modbus across ENGEL, WOOJIN and SUMITOMO equipment.
- Developed **React** apps and **Power BI** dashboards for OEE, plan adherence, downtime, quality and management visibility.
- Digitized HR incidence and attendance workflows with time-clock integration, eliminating paper-based tracking.

Oct 2023 – 2024

Claims, Loss & Recovery Coordinator

Operational analytics role focused on financial recovery, evidence control and management reporting.

- Recovered **MX\$15.2M** in logistics claims within one year through structured case analysis and evidence management.
- Managed **100+ investigations** across claims, supplier follow-up and executive reporting.
- Built **Power BI** dashboards that reduced analysis time by 40% and improved recovery visibility.
